

Robbie Torres

Oakland, CA | RobbieETorres@gmail.com | linkedin.com/in/robbietorres | robbietorres.info

Technical program manager with 12+ years running production e-commerce platforms and six years managing a frontend engineering team across 30+ sites. AI-fluent builder who uses Claude daily as a working partner across code, analysis, and shipping internal tools.

SKILLS

Technical Program Management · People Management · Platform Migrations · Vendor Management · Cross-Functional Coordination · A/B Testing & CRO · AI-Augmented Development (Claude, Workers AI + Llama 3.1, prompt engineering, LLM API integration) · JavaScript, React, HTML/CSS, PHP · Cloudflare Workers/Pages/D1/R2 · AWS · API Integration (REST, OAuth 2.0) · SQL · GA4 · Looker Studio · GTM · Optimizely · VWO · Asana · Jira · Figma · Adobe Creative Cloud · WordPress/WP Engine · CORESense · Technical SEO · WCAG · Git/GitHub Actions

EXPERIENCE

Manager of Web Systems & Development | Adair Family Wines | 2024–2026

Led web technology, e-commerce platforms, data analytics, and digital infrastructure across 6 properties — covering platform development, e-commerce ops, and analytics/reporting.

- Built a custom DAM platform on Cloudflare Workers/Pages/D1/R2, replacing \$30K+/yr commercial tools with a ~\$600/yr solution; also built a multi-property health dashboard surfacing 1,800+ SEO/accessibility/performance issues with no prior visibility
- One of 4 leads on a \$20M e-commerce platform migration across 6 brands; built the only internal tracking system (37-requirement decision matrix, vendor log, gap tracker) and pushed launch back based on QA testing rigor
- Built and deployed Black Friday/Cyber Monday infrastructure across 5 brands, supporting \$245K+ in combined sales across 750+ orders in one weekend
- Built unified GA4 (6 streams, cross-domain attribution, GTM) and Looker Studio dashboards; took over wholesale reporting with zero documentation and identified \$436K in transactions with no prior visibility across 13 partners and 11+ states
- Managed 4+ external vendors as primary technical escalation contact; integrated reservation system via OAuth/webhook API
- Used Claude as a daily working partner for code generation, debugging, data analysis, SQL, SOPs, and stakeholder communications

Director of Web Dev & Programming | Vintage Wine Estates (VWE) | 2022–2024

Directed technical operations across 30+ production e-commerce websites with a team of 2 frontend developers; owned hiring, performance management, and career development. Also led technical aspects of VWE's Chapter 11 wind-down.

- Reduced page load times by up to 80% across all sites through systematic front-end optimization
- Contributed to over 100% annual revenue growth across the portfolio for five consecutive years through strategic platform improvements (responsive design, shopping cart updates, performance, club customization, SEO), in partnership with the CTO and marketing leadership
- Promoted a direct report from Web Developer to Senior Frontend Developer in 2022; supported continued growth through 2024
- Led technical wind-down and migration of websites, third-party SaaS, and data to purchasers following VWE's Chapter 11 proceedings
- Led migration and redesign of 25+ e-commerce sites as the company expanded through acquisitions; led Salsify PIM onboarding and MikMak analytics rollout

Senior Web Developer | Vintage Wine Estates (VWE) | 2018–2022

First management role at VWE; built and led the frontend engineering team while continuing hands-on development across 20+ brand sites.

- Hired, managed, and developed a frontend engineering team of up to 2 direct reports
- Built custom wine club checkout workflow on CORESense, partnering with the platform's lead developer on co-written APIs; achieved 300% YoY revenue increase within 24 hours of launch
- Led integration of Talkable referral program across most VWE sites; launched a native CORESense loyalty program with co-written custom APIs
- Ran A/B testing and CRO programs using Optimizely, Visual Website Optimizer (VWO), Google Optimize, and Lucky Orange (loading-icon experiments at ~5% pageview lift; free-shipping CTA test with significant conversion lift)
- Wrote MySQL queries for ad-hoc reporting supporting wine club operations, marketing, and platform migrations

Web Content Manager | Vintage Wine Estates (VWE) | 2013–2018

- Established Asana as the project management tool company-wide
- Onboarded and migrated 25+ newly acquired brand websites as VWE expanded through acquisitions, integrating responsive design and SEO best practices
- Built a QR code generator used company-wide as a marketing tool; did hands-on development, content management, and analytics work across the portfolio

Web Producer | Spirit Clips (Hallmark Labs) | 2012–2013

Helped launch Zendesk for customer service; managed content operations for a digital film library platform with 700+ assets; collaborated with technology partners and assisted the CTO with SOPs.

SELECTED PROJECTS

Personal projects shipped over the past year using Claude as a development partner. RT Pottery has live customers; the others are deployed but do not currently have paying users.

- **RT Pottery** (rtpottery.com) — Live e-commerce site for personal ceramics business, sold at Oakland markets. PayPal checkout, admin panel, R2 image hosting, GA4. Stack: React + Vite + Tailwind, Cloudflare Pages + Functions, D1, KV, R2.
- **Shelob Web** (shelobweb.com) — Multi-tenant website health monitoring SaaS (SEO, Core Web Vitals, accessibility, AI readiness, broken links) with magic-link auth, RBAC, Stripe billing, and Google OAuth (GA4 + Search Console; verification in progress). Nightly Workers AI (Llama 3.1) fix suggestions.
- **Trade Pourtal** (tradepourtal.com) — Multi-tenant SaaS for wine trade asset management with subdomain/custom-domain branding, version control, RBAC, JWT auth, and audit logging.
- **AI Job Search Agent** — Aggregates jobs from Remotive, Arbeitnow, Adzuna, and JSearch; AI scoring against a resume using Workers AI; cover letter generation; application pipeline tracking.
- **In My Life** — Self-hosted task and notification system with multi-channel escalation (email, SMS, push) on Cloudflare Workers; in personal use.

EDUCATION

BFA, Graphic Design — California State Polytechnic University, Pomona, CA
